Since the tables are unavailable and the forum is mostly not available at the moment, I thought I'd re-download it here. I didn't make that table. Unfortunately, I can't remember which members actually set it up (there were three or four last contributors, iirc). I am that made a small adjustment for the recent version of steam game, since the player structure moved a bit and so did this layout. But that was it. Sooo Sooo credit me because I'm just a leecher with an exchange in mind. Enjoy :) How do I use this cheating table? Install Cheat Engine Twice Click. A CT file in order to open it. Posts: 4 Joined: Thu Mar 02, 2017 11:54 pm Reputation: 0 Post herpaderpa40 Sun Mar 05, 2017 7:58 pm From what I last checked on the table you downloaded. The movement in the player stats was duplicated to be good luck instead; so there are two luck in player stats. Although, with tinkering a bit with the older version of the cheating table I had some time ago, the traffic slot for player statistics from the old table is still working in the new And in the new table which I just copied and modted working workers player stats from the old table to the current. It's not that cool and I don't know how to fix it to be in with other player stats, but at least it's better than nothing. EDIT: Come to point out that the Pedestal script works. My friend! The isaac-ng\_ withmovementfix.ct Cheat button application, which has a movement player stat works, along with all the other things in the table that was posted in the OP. All you have to do is activate the script, pick up the item from the pedestal, and then you'll be able to change the pedestal item to whatever you like. The graphics won't change, the pedestal will still seem empty (unless you use a fashion description that will show the correct description). Sorry, kick against an empty pedestal and you got your point. Also, if you're not sure to pick up the item of use while you already have an item of use on you, you'll see that the pedestal gets the item ID thing you just changed. I was looking at the stats hack, but i wasn't able to easily fix it with compensation, and i'd rather not screw around with my actual stats trying to find it, just. herpaderpa40 What is cheating? Things related to player pointers don't work, but things like endless bombs works. It also has a scenario for guaranteed wins with bombs! I know someone was looking for him, so it is. I also haven't tested it, but I doubt it works. Hopefully someone can fix this table so it works. KTAB's apps.
