Fix the DLL Hijacking vulnerability of previous versions (by updating NSIS to v3.0). Improving automatic updates: Periodic verification can be disabled by automatically updating the operational dialogue. Improving the installation: Check if the notepad is working and ask the user to close it before continuing to work. Improvement: Add conflict detection to Shortcut Mapper. Fix the automatic completion on the XML and the tags. Fix a file save failure that can be played with a specific way to save a file. Fix the glitch while the UDL user's keyword list is too long. Fix HDPI problems for some components (task list, field, and shortcut mapping). Add a new feature (optional) : Close the last document that will come out of Notepad. Add more case change options (name case, offer case, IVERT caSE, rANdOm caSe). Add an open file and open a folder command on the selected file/daddy name in the text content. Add an Internet search team for the chosen word (s) to Content. Add a scroll Tab Bar with mouse wheel capacity. Add commands to move the current Forward/Back tab. Fix the monitoring error by not working for the files under the root. Ruby is supported by a list of features. Added a new option: Turn on the scroll outside the last line. Add an option to restore old behavior (open files in the folder) when you delete the folder. @Carsten-S. sorry for the delay delay Unfortunately, there is no log for plug-in traffic admin attempts at the moment, and it still lacks a lot of error messages as well as proxy support. But if you have time, please start the portable notepad that you downloaded on the link above. Then go to the Help menu (?) and select debugging information to copy that debugging information into the clipboard and insert it here. Also, please try the same portable version on the link above on another computer, using another internet connection and preferably another place, and then tell us your result. If this is of interest, two possible causes for the symptoms described could be: the machine that shows this behavior behind the proxy that separates this machine from direct access to the Internet. (You can double-check this by opening cmd.exe and enter ping google.com.if the host can't be found, you're most likely behind the proxy) affected user accounts on the machine that shows such behavior, has permission to create and modify files on your desktop, but has spawned a third process initiated by the application that runs and/or belonging to that account, do not have permission to create files or folder structures. Structure. notepad++ portable zip file download. notepad++ portable zip file
